

Hire Station Carlisle open for business

New Hire Station branch opens in Carlisle with a new 8000 square foot unit.

As part of Hire Station's plans to plug current geographical gaps in our branch network, a new Carlisle branch was opened for business during July.

Hire Station Carlisle branch

As well as providing Hire Station with a much needed 'bridge' between Glasgow and Manchester, Carlisle will help us support customers in the Cumbria/North Lancashire area.

The circa 8000 square foot unit is located on a trade industrial estate close to the M6 motorway, south of Carlisle City Centre. The unit has been fully shop-fitted to include a counter and showroom area and a repair and test & run workshop.

Hire Station Carlisle Trade Counter

Our friends at Torrent are also using the branch as a satellite location. Their fitters are conducting the servicing of Hire Station equipment on hire to Network Rail as part of this recently won major contract.
